

# ActiveGEM Reference Sheet

## Starting the program:

`plotGEM`

## Common command line arguments:

`-h` (help)  
`-v` (plotGEM version)  
`-file filename` (load file)

## Running the debugger:

`<control-d>` (with main window active)

## ActiveGEM home page:

<http://activegem.sourceforge.net>

## ActiveGEM project page:

<http://sourceforge.net/projects/activegem>

## Bug report, feature or support requests:

<http://sourceforge.net/projects/activegem>

In your error report, please include detailed information about the source of the problem (i.e. traceback or debugger information, if available), what you were doing when the problem occurred and the commands that you gave to produce the error. If the problem is reproducible, please include an itemized set of steps to take to generate the error.
